Cities and sustainable, resilient & inclusive food systems:

How does multi-level governance help secure urban food security, the right to food and healthy diets?

8 March 2024
10:00 - 13:00 CET

Online

Cities stand as pivotal players in shaping the trajectory of food systems across urban, peri-urban and rural landscapes, as well as in implementing the right to food and enabling healthy diets. This urban shift brings both opportunities and challenges to the forefront.

The critical role of cities in addressing challenges within food systems and countering issues related to unhealthy urban diets cannot be overstated.

Join us for an event co-organized by the Global Cities Hub, the Nutrition in City Ecosystems (NICE) project, in cooperation with the Food and Agriculture Organization (FAO), to discuss how multilevel governance can help transform urban food systems and how to safely and affordably deliver and promote better nutrition and healthier diets to urban consumers.

Speakers

- **Corinna Hawkes**, Director, Food Safety and Food Systems Division, FAO
- **Dominique Burgeon**, Director, Geneva Liaison Office, FAO
- **H.E. Marie Chantal Rwakazina**, Permanent Representative of Rwanda (TBC)
- **Md Abu Toyeb Ali Dulal**, Acting Mayor, Dinajpur, Bangladesh
- **Helen Prytherch**, NICE Project lead, Swiss Tropical & Public Health Institute
- **Jess Halliday**, Chief executive, RUAFA Global Partnership on sustainable urban agriculture and food systems
- **Christophe Golay**, Senior Researcher, Geneva Academy
- **Marylaure Crettaz**, Head, Food Systems Section, Switzerland (SDC)

Moderated by **Anh Thu Duong**, Co-Director, GCH
